World Horticultural Trade and U.S. Export Opportunities

U.S. Horticultural Exports in FY 2001 Forecast at a Record \$11.4 Billion

F= Forecast

Source: U.S. Department of Commerce, Bureau of the Census

U.S. horticultural exports in fiscal year (FY) 2001 are forecast to increase 8.2 percent from FY 2000 to \$11.4 billion. U.S. exports of horticultural products to all countries in April 2001 totaled \$900 million, an increase of 10 percent from the same month a year earlier. Categories with the most significant increases in April were essential oils (up 37 percent to \$58 million), wine and beer (up 30 percent to \$73 million), fresh fruit (up 19 percent to \$155 million), and tree nuts (up 19 percent to \$69 million). April exports to Canada, the largest market, were up 3 percent from April 2000, to \$290 million. Exports to the European Union (EU) and Japan were up 28 and 1 percent, respectively to \$166 million and \$142 million. Exports to Mexico rose 5 percent to \$63 million. Exports to China showed the most dramatic jump for April 2001, up 110 percent from April 2000, to \$15 million, while exports to Malaysia rose 51 percent to \$8 million. Exports to Korea rose 9 percent, to \$31 million and exports to Hong Kong and Taiwan rose to \$26 million and \$21 million, respectively. Exports for the October-April 2000/01 period were up 9 percent from the same period in 1999/2000 to \$6.5 billion. Tree nut exports are up 23 percent to \$744 million for the October-April 2000/01 period, while fresh fruit exports are up 17 percent to \$1 billion, and fresh vegetable exports are up 9 percent to \$756 million. The fastest growing markets for FY 2001 to date are: China, up 102 percent; Malaysia, up 64 percent; Taiwan, up 20 percent; the Philippines, up 18 percent; Hong Kong, up 16 percent; Mexico, up 13 percent; and the EU, up 13 percent.

Export Summary

April 2001

U.S. exports of horticultural products to all countries in April totaled \$900 million, an increase of 10 percent from the same month a year earlier. Categories with the most significant increases in April were essential oils (up 37 percent to \$58 million), wine and beer (up 30 percent to \$73 million), fresh fruit (up 19 percent to \$155 million), and tree nuts (up 19 percent to \$69 million). The only categories that declined were processed vegetables (down 6 percent to \$14 million) and fresh vegetables (down 1 percent to \$12 million).

April exports to Canada, the largest market, were up 3 percent from April 2000, to \$290 million. Exports to the European Union (EU) and Japan were up 28 and 1 percent, respectively to \$166 million and \$142 million. Exports to Mexico rose 5 percent to \$63 million. Exports to China showed the most dramatic jump for April 2001, up 110 percent from April 2000, to \$15 million, while exports to Malaysia rose 51 percent to \$8 million. Exports to Korea rose 9 percent, to \$31 million and exports to Hong Kong and Taiwan rose to \$26 million and \$21 million, respectively.

Exports for the October-April 2000/01 period were up 9 percent from the same period in 1999/2000 to \$6.5 billion. Tree nut exports are up 23 percent to \$744 million for the October-April 2000/01 period, while fresh fruit exports are up 17 percent to \$1 billion, and fresh vegetable exports are up 9 percent to \$756 million. The fastest growing markets for FY 2001 to date are: China, up 102 percent; Malaysia, up 64 percent; Taiwan, up 20 percent; the Philippines, up 18 percent; Hong Kong, up 16 percent; Mexico, up 13 percent; and the EU, up 13 percent. Exports to Japan are down 1 percent for the October-April 2000/01 period compared with the same period last year.

New U.S. Trade Internet System

The public now has unlimited access to the most up-to-date data on U.S. exports and imports of agricultural, fishery, and forestry products. The U.S. Trade Internet System allows users the flexibility to customize their data searches and save their criteria for repeated use. Users can obtain value or volume data for selected harmonized codes or commodity groupings to track trends going back to 1989.

To view the site go to <http://www.fas.usda.gov/ustrade/>

For more information on the U.S. Trade Internet System, e-mail usthelp@fas.usda.gov

To access **FAS Attache Reports** on line, please go to the following Internet address:

[Http:// www.fas.usda.gov/scripts/attachrep/default.asp](http://www.fas.usda.gov/scripts/attachrep/default.asp)

Search through the country and market reports prepared by FAS attaches covering over 20 horticultural and tropical product commodities and nearly 130 countries.

What's New on the Homepage?

The Horticultural and Tropical Products Division has introduced a feature on its homepage designed to bring the latest information to the public as efficiently as possible. The site contains information on policy and technical developments affecting trade in horticultural commodities, selected reports submitted by FAS overseas offices, and special reports. For further information, please contact Nancy Hirschhorn (202)720-2974. Go to <http://www.fas.usda.gov/http/>.

Processed Tomato Products Situation and Outlook in Selected Countries

Production of tomatoes for processing in 11 major producing countries in 2001 is forecast at 21.3 million metric tons, down 6 percent from 2000. The decline was attributed mainly to a 12-percent drop in U.S. output and a 23-percent decline in Eastern Mediterranean countries, with Turkey accounting for the region's largest decline. Production of tomato paste in selected countries, excluding the United States, in 2001/02 is forecast at 1.41 million tons, down 1 percent from last year, due mostly to continued abundant supplies and lower prices. Production of canned tomato pack in selected countries in 2001/02 is forecast at a record 2.32 million tons, up 7 percent due primarily to an expected large increase in Italian output. During this same period, exports of tomato paste from selected countries are forecast at 950,000 tons, down 4 percent from 2000/01, while exports of canned tomato pack are forecast at 991,000 tons, a marginal increase from 2000/01.

Western Hemisphere

In the **United States**, production of processing tomatoes under contract in 2001 is estimated at 8.6 million tons, down 12 percent from 2000. The decline in output is due mainly to a major reduction in area caused by large carryover of stocks and lower wholesale prices for tomato products during the marketing year. California accounts for about 95 percent of the U.S. processing tomato crop. The bulk of U.S. tomatoes for processing is for tomato paste output.

U.S. exports of tomato products (canned tomatoes, tomato paste, ketchup, and tomato sauce) in calendar year 2000 totaled 274,000 tons valued at \$215 million, unchanged in volume and down 5 percent in value from 1999. Canada remained the biggest U.S. customer for tomato paste, sauce and canned tomatoes, while Japan was the top market for U.S. ketchup. U.S. imports of processed tomato products (canned tomatoes, ketchup, tomato paste and sauce) during the same period totaled 79,000 tons valued at \$50 million, down 52 percent in volume and down 57 percent in value from 1999, due mostly to sizeable decreases in paste imports from Chile and Greece.

In **Mexico**, production of tomatoes for processing in 2001 is forecast at 200,000 tons, down 5 percent from an earlier forecast, mainly due to a reduction in planted area. The reduction is attributed to oversupply problems, decreased international demand, and lower world prices. Tomato paste production in Mexico in 2001/02 (March to February) is forecast at 30,000 tons, up 5 percent from the revised volume in 1999. As in previous years, international stocks continue to be very high. In 2001, exports of fresh tomatoes from Mexico to the United States, are expected to total around 690,000 tons, similar to exports of 2000. Winter tomato exports had similar price problems in 2001

as the previous year. During several weeks, export prices were as low as the U.S. minimum floor price of \$5.27 per 25-pound box. Tomato exports have been significantly reduced in an effort to prevent the price from decreasing below the U.S. minimum floor price.

In **Brazil**, production of tomatoes for processing in 2001 is forecast at 1.25 million tons, up 4 percent from the revised level in the previous year. Marketing, sales, and prices of the 2000 crop were considerably better than during the previous year, encouraging producers to increase acreage and production. Increased success in fighting pests in the Bahia Region should also contribute to the production increase. New higher-yielding tomato varieties are also expected to further boost yields and production. Nearly all of Brazil's processing tomatoes are made into paste. Output of tomato paste in 2001 is forecast at 130,000 tons, up 18 percent from the previous year. The majority of the paste is used in further processing for consumer-ready sauces and other such products.

In **Chile**, output of tomatoes for processing in 2001 is forecast at 750,000 tons, down 13 percent from 2000, due largely to lower-than-expected tomato quality as a result of adverse weather conditions. Tomatoes for processing in Chile are planted from mid-September through December of each year and harvested from January 10 to April 15. Output of tomato paste in 2001 is forecast at 95,000 tons, down 7 percent from 2000. This drop is due in part to the lower-than-expected output of tomatoes for processing.

Mediterranean Area

Production of tomatoes for processing in 2001 in the major producing countries in the European Union (EU) is forecast at 8.8 million tons, about the same as the previous year.

In **Spain**, production of tomatoes for processing in 2001 is forecast at 1.5 million tons, up slightly from 2000. This is due primarily to greater processors' intake due to a higher EU production quota and lower ending stocks of both canned and paste tomatoes in 2000. Canned tomato production for 2001 is forecast at 218,500 tons, up 12 percent from 2000 as a result of higher deliveries of fruit to processors. Spanish production of canned products under the new CAP for processing tomatoes will be located increasingly in the western region of Extremadura, where land and water are abundant. Tomato paste production in 2001 is forecast at 186,600 tons, up 10 percent from the previous year as a result of higher deliveries of fruit to processors, as well. Spain is a net exporter of fresh, canned and other tomato products, with very little market opportunities existing for U.S. exports of these products.

In **Portugal**, output of processed tomato products (mainly tomato paste) in 2001 is expected to be slightly above the 2000 output of 173,354 tons. Production of tomatoes for processing in 2001 is forecast at 966,000 tons, up 13 percent from 2000. Tomato paste production in Portugal in 2001 is forecast at 160,000 tons, up 2 percent from the previous year. Tomato paste exports, accounting for the bulk of Portugal's tomato paste production, are forecast at 130,000 tons, a slight increase from

the previous year. As Portugal is self-sufficient in tomato and tomato products production, there are few opportunities to export U.S. tomato products to Portugal.

In **Greece**, production of tomatoes for processing in 2001 is forecast at 1.29 million tons, up 12 percent from a year ago, due largely to a higher planted area. Production of tomato paste in Greece in 2001 is forecast at 207,000 tons, up 15 percent from 2000, attributed to higher quantity and improved quality of fruit delivered to processors. Canned tomato production in 2001 is forecast at 33,000 tons, down 11 percent from 2000, due mostly to decreased deliveries to processors.

In **Turkey**, production of tomatoes for processing in 2001 is forecast at 1.3 million tons, down 24 percent from the previous year, due mainly to reduced area, caused by the dissatisfaction felt of Turkish farmers with the cash returns received for industrial tomatoes last year. Following last year's large global production of tomato paste and the accompanying lower world prices, and also one of the worst financial crises to hit Turkey in many years, many industrial farmers are shifting to other cash crops such as corn, wheat, and rice. Also, processors in Turkey are cautious about the potentially large output in California and extremely low export prices offered by China, and are not willing to increase their overall production volume this year. Production of tomato paste in 2001 is forecast at 200,000 tons, down 23 percent from 2000, due mostly to increased international competition coming from the United States and China.

In **France**, production of tomatoes for processing in 2001 is forecast at 320,000 tons, up 2 percent from 2000, as a result of the increased production threshold for France set by the reformed EU Common Organization of the Market for fruits and vegetables. Production of tomato paste accounts for the bulk of processed tomatoes in France. In 2001, output of paste is forecast at 44,000 tons, up slightly from the previous year, due mostly to an increase in fruit delivered to processors. Production of canned tomatoes for the same period is forecast at 16,000 tons, also slightly down from 2000. France is a minor producer of processed tomato products and continues to be a net importer of both canned tomatoes and tomato paste. There is almost no trade between the United States and France for these products.

In **Israel**, production of tomatoes for processing in 2001 is forecast at 174,000 tons, down 22 percent from the revised output in 2000. This is due, in most part, to reduced area, high carryover stocks for processed products (canned tomatoes, tomato paste and sauce), and stiff international competition such as in the EU market for these products. In 2001, production of tomato paste in Israel is forecast at 20,880 tons, down 18 percent from the previous year, due mostly to fewer tomato deliveries to processors.

In **Italy**, production of tomatoes for processing in 2001 is forecast at 4.9 million tons, up slightly from the previous year, due to an increased planting area. This is despite a planned EU subsidy cut for the 2001 marketing year. The absence of a national production plan due to poor inter-professional coordination and weak vertical integration in the southern Italian tomato industry

(which accounts for around 60 percent of total production of tomatoes for processing) help account for this situation.

(The FAS Attache Report search engine contains reports on Tomatoes and Tomato Products industries for more than 10 countries, including the United States, Italy and Chile. For information on supply and demand, please contact Erik Hansen at (202) 720-0875. For information on marketing issues contact Elizabeth Mello at (202) 720-9903.

World Raisin Situation and Outlook

Raisin production in selected countries in the Northern Hemisphere is expected to decline in 2001/02 (September 2001 - August 2002). Total production in Turkey and Mexico is projected to decrease by 2 percent compared to the previous year. Raisin production in Greece is expected to remain the same at 26,000 tons. 2001/02 raisin exports from Greece, Turkey, and Mexico are expected to slightly increase by 1 percent. U.S. raisin exports are expected to fall, primarily due to lower-priced competition from Turkey and Greece. Raisin production in selected countries in the Southern Hemisphere (Australia and South Africa) is projected to decline by 75 percent in 2001. In addition, raisin exports from these countries are expected to drop by 20 percent as a result of lower production levels and depressed market prices.

Northern Hemisphere

Greece

The 2000/01 raisin crop (September 2000 - August 2001) has been revised upward to 29,000 tons, an increase of 29 percent from the previous year. Unlike the 1999 season, normal temperatures prevailed, resulting in a larger harvest and production of better quality produce. The 2001/02 production level is expected to increase slightly.

Raisin exports are expected to increase by 4 percent from 24,000 tons in 2000/01 to 25,000 tons in 2001/02. Germany is the largest market for exported raisins originating from Greece, followed closely by the Czech Republic, Australia, and Canada. Raisin imports into Greece are minimal (500 tons in MY 2000).

Turkey

Raisin production for 2000/01 increased by more than 31 percent, primarily because of the allure of higher export prices. Production levels, however, are expected to slightly decrease in 2001/02 given the recent downward trend of export prices.

The recent devaluation of the Turkish Lira spurred raisin exports to record levels in 2000/01, from 192,433 tons to 210,000 tons. The United Kingdom, Germany, the Netherlands and Italy are the leading export markets for raisin exports originating from Turkey. Turkey applies a 56.7 duty on imported raisins, primarily to protect its domestic industry.

Mexico

Although raisin production in 2000/01 increased from the previous year, economic uncertainty and limited water supplies have led to a lower production forecast for 2001/02 from 16,000 tons to 15,000 tons. Lack of credit availability has also impeded growers' ability to expand production.

Lower international prices and a surplus supply of raisins on the global market slightly decreased Mexico's raisin exports by 3 percent from 7,783 tons to 7,500 tons in 2000/01. Nevertheless, raisin exports are forecasted to increase by 20 percent in 2001/02. The United States remains Mexico's largest export market for raisins. Chile accounted for 86 percent of the total raisin imports into Mexico in 2000/01.

United States

Raisin production reached record levels in 2000/01 from 310,653 tons to 412,770 tons, a 33- percent increase from the previous year. Large stock levels and depressed prices are expected to lower the production level in 2001/02.

Raisin exports are expected to rebound in 2000/01 reaching 115,000 tons. Year to date (August 2000 - April 2001) raisin exports are 84,348 tons. 2001/02 exports are projected to decline as surplus supply of cheaper raisins from lower-cost international producers inundate the global market. Japan, the United Kingdom, Canada, Sweden, and Denmark remain major markets for U.S. raisins.

For the 2001/02, the Raisin Administrative Committee (RAC) has received a budget ceiling of \$1.78 million to market California raisins under the Market Access Program (MAP). Japan, the United Kingdom, and Scandinavia continue to be RAC's largest target markets, although funding has also been requested for markets in the East Asia Region. MAP funds will be used to convince consumers to purchase California raisins based on their high quality and nutritional levels. The requested funding will also be used to help convince retailers, bakeries and the food service industry to buy California raisins for their value added properties. The RAC also requested Emerging Markets Program funding for activities in India and Eastern Europe. These proposals are under consideration.

Southern Hemisphere

Australia

The 2001/02 raisin production (March 2001 - February 2002) is projected to fall by more than 45 percent from 26,667 tons to 14,500 tons. Cooler conditions have contributed to the production decrease. Industry analysts also suspect that part of the decline may be due to the diversion of grapes

from fruit to wine production.

Smaller production levels and competition from lower priced products have resulted in a 38-percent drop in exports. This declining trend in exports is expected to continue into 2001/02. Germany, the United Kingdom and Canada are the largest export markets for Australia's raisins. Turkey remains the dominant raisin supplier to Australia.

South Africa

Raisin production is expected to fall by 11 percent in 2001 (January 2001 - December 2001) as a result of Downy Mildew disease and warmer climate conditions. Production levels are forecast down from 38,142 tons to 34,000 tons.

Raisin exports during the same period are expected to drop by 15 percent to 21,000 tons. The United States, Brazil, Germany, France and the Netherlands are the leading raisin markets for South Africa's raisin exports. In 2001, exports are expected to further decrease as a result of an increase in domestic demand and lower world prices.

The Agricultural Product Marketing Act of 1997 liberalized the South African raisin market, thus, the domestic and international sales of raisins operate under a free marketing system.

(The FAS Attache Report search engine contains reports on the Dried Fruit industries for 6 countries, including Australia, Chile, and South Africa. For information on production and trade, contact Rey Santella at 202-720-0897. For information on marketing contact Kristin Kezar at 202-690-0556.)

World Trade Situation and Policy Updates

Florida Growers to Get Funds for Citrus Canker

Florida growers won two battles in mid-June in their fight against citrus canker. Following the release of funds from the Office of Management and Budget, the U.S. Department of Agriculture published a final rule clearing the way for payments to growers who've lost groves to the disease and its attendant eradication efforts. The canker eradication effort has removed 579,000 residential trees in south Florida and more than 1.3 million commercial trees. Since November, the department estimates an additional 90,000 trees were exposed to the disease as crews were prevented from cutting and destroying about 80,000 trees. Payments totaling \$46 million to commercial growers could start within 60 days. Growers of oranges and limes will receive more than \$6,000 per acre destroyed, while grapefruit growers will receive more than \$3,000. About 8,500 commercial acres have been lost to the disease since it first was discovered in a Miami neighborhood in 1995. The most significant damage came when storms carried it south of Miami into the state's lime region, where it took out more than two-thirds of the 3,000-acre crop. (June 22, 2001)

U.S. International Trade Commission (ITC) Issues Negative Determination in Antidumping Cases against Spring Table Grapes from Chile and Mexico

On June 11, 2001, the U.S. International Trade Commission (ITC) issued a negative determination in its preliminary phase antidumping investigations in the case filed by the Desert Grape Growers League of California concerning Spring Table Grapes from Chile and Mexico. The Commissioners voted five to one that there is not a reasonable indication that a U.S. industry is materially injured or threatened with material injury by reason of imports of spring table grapes from Chile and Mexico that are allegedly sold in the United States at less than fair value. The scope of the case excluded by-product grapes and other grapes for use as other than table grapes, including those grapes used for raisins, crushing, juice, wine, canning, processed foods and other by-product and not direct consumption purposes. The spring table grapes subject to these investigations are classifiable under 0806.10.40 of the Harmonized Tariff Schedule of the United States (HTSUS).

ITC Initiates Preliminary Countervailing Duty and Antidumping Investigations on Frozen Red Raspberries from Chile

On May 31, 2001, the ITC officially began its investigation into allegations that individually quick frozen(IQF) red raspberry imports from Chile were being sold in the United States at less than fair value. The investigations are being instituted in response to a petition filed by the IQF Red Raspberry Fair Trade Committee, Washington, DC. The ITC will hold a preliminary conference on these investigations on June 21, 2001. A preliminary determination is expected by July 16, 2001 as to whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States

is materially retarded, by reason of imports from Chile of individually quick frozen red raspberries. U.S. imports of frozen raspberries in CY 2000 were valued at more than \$13 million, of which \$8 million originated from Chile.

Export News and Opportunities

Are you interested in exporting but hesitating because you are concerned about getting paid? If so, do not overlook the billions of dollars the U.S. Department of Agriculture (USDA) makes available to help facilitate sales to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without credit guarantees. Invest the time to learn more about the Export Credit Guarantee Program (GSM-102) and Supplier Credit Guarantee Program (SCGP) to increase your sales and lower your risks. Use GSM and SCGP to avoid possible importer and foreign bank defaults on payments and ensure that American farm and food products continue to move to markets around the world. USDA does not provide financing, but it guarantees payments due to U.S. exporters in case the foreign banks or importers default. As of June 8, horticultural exporters have registered \$3.08 million in sales under SCGP.

You may learn more about GSM-102 and SCGP regulations, country specific press releases and program announcements, and a Monthly Summary of Export Credit Guarantee Program Activity on the Internet at:

<http://www.fas.usda.gov/export.html>

GSM-102

On June 12, USDA amended the GSM-102 Program in the Caribbean Region, Central America Region, and South America Region to allow for the financing of sales through eligible banks approved by Commodity Credit Corporation (CCC) in the Caribbean, Central, and South America Regions. Exporters are advised to obtain from their foreign buyer the name of the CCC-approved foreign bank that will be opening the letter of credit. All other terms and conditions as previously announced remain the same.

On May 31, USDA amended the GSM-102 for Indonesia. This amendment increases the program allocation to \$650 million from \$500 million. All other terms and conditions previously announced remain the same.

The GSM-102 program makes available credit guarantees for sales of U.S. agricultural commodities overseas. USDA does not provide financing, but guarantees payments due from foreign banks. USDA typically guarantees 98 percent of the principal and a portion of the interest. The GSM-102 program covers credit terms from 90 days to 3 years.

Under the program, once a firm sale exists, the qualified U.S. exporter applies for a payment guarantee before the date of export. The U.S. exporter pays a fee calculated on the dollar amount guaranteed, based on a schedule of rates applicable to different lengths of credit periods. The CCC-

approved foreign bank issues a dollar-denominated, irrevocable letter of credit in favor of the U.S. exporter, ordinarily advised or confirmed by the financial institution in the United States agreeing to extend credit to the foreign bank. The U.S. exporter may negotiate an arrangement to be paid as exports occur by assigning the U.S. financial institution the right to proceeds that may become payable under the guarantee, and later presenting required documents to that financial institution. Such documents normally include a copy of the export report. If a foreign bank fails to make any payment as agreed, the exporter or the assignee may file a claim with USDA for the amount due and covered by the guarantee. USDA will pay the U.S. bank and will take on the responsibility of collecting the overdue amount from the foreign bank.

Supplier Credit Guarantee Program

The SCGP is unique because it covers short-term financing extended directly by U.S. exporters to foreign buyers and requires that the importers sign a promissory note in case of default on the CCC-backed payment guarantee. The SCGP emphasizes high-value and value-added products, but may include commodities or products that also have been programmed under the GSM-102 program.

The SCGP encourages exports to buyers in countries where credit is necessary to maintain or increase U.S. sales but where financing may not be available without CCC guarantees. Under the SCGP, CCC guarantees a portion of payments due from importers under short-term financing (up to 180 days) that exporters have extended directly to the importers for the purchase of U.S. agricultural commodities and products. These direct credits must be secured by promissory notes signed by the importers. CCC does not provide financing but guarantees payment due from the importer.

GSM-102 and SCGP

The following tables present the FY 2001 GSM-102 and SCGP for which USDA has allocated credit guarantees for sales of U.S. horticultural products. The table also includes horticultural sales (exporter applications received) that have been registered under GSM-102 and SCGP. For most countries and regions, exporters may apply for credit guarantees on a first-come-first-served basis to cover sales of any of the eligible commodities published in FAS program announcement PR 0096-01, issued March 20, 2001 or as superseded. The following horticultural products are eligible under the export credit guarantee programs: dried fruit; fresh fruit; frozen fruit; canned fruit; 100-percent fruit juices; fruit and vegetable concentrates, pastes, pulps and purees; honey; hops or hops extract; beer; tree nuts; fresh vegetables; canned vegetables; dried vegetables; wine; and brandy. The General Sales Manager will consider requests to establish an SCGP and/or GSM Program for a country or region or amend an authorized program to include horticultural commodities and products that are currently not eligible.

(For further information on the SCGP or GSM-102 Program for horticultural commodities, contact Yvette Wedderburn Bomersheim on 202-720-0911 or Rochelle Foster on 202-720-2936).

Think outside the borders.

Ever felt like you were trapped inside a cookie cutter, with all your competitors chasing the same customers?

Well, **96 percent of the world lives outside our borders** and, with a little effort and a little help, you can reach them.

USDA's Ag Export Services can put your message on line and in newsletters, translated into dozens of languages and in front of **buyers in 75 countries for \$15**. And that's just for starters.

To learn how you can sell your food or fiber products outside our borders, contact USDA's Ag Export Services.

Phone: 202-690-3576 • Fax: 202-690-0193

ALL SALES ARE FINAL

NTIS electronically stores our collection of almost 3 million items and custom-reproduces a single copy specifically for your order. Therefore, NTIS does not accept cancellations, requests for modifications, or returns for credit or refund. All sales are final. If you believe the item you received is defective or if we made an error in filling your order, please contact our Subscriptions Department via e-mail at subscriptions@ntis.gov or by phone at 1-800-363-2068 or (703)605-6060.

SINGLE COPIES

To order, call NTIS Sales Desk 1-800-553-NTIS (6847) or (703) 605-6000; fax to (703) 605- 6900; or E-mail to: orders@ntis.gov.

For single copies, add \$5 handling fee per total order for U.S., Canada, Mexico; \$10 per total order for all other countries. RUSH service is available for an additional fee; please call the NTIS Sales Desk for details.

contact us at the address shown above.

Summaries and selected tables from many Foreign Agricultural Service world market and trade reports are available electronically. The reports include U.S. Export Sales (available electronically after 8:30 a.m. on release day); Grain: World Markets and Trade; Oilseeds: World Markets and Trade; Cotton: World Markets and Trade; Tobacco: World Markets and Trade; World Agricultural Production; the early release version of World Horticultural Products and U.S. Export Opportunities; and Tropical Products: World Markets and Trade (all available electronically after 3:00 p.m. Washington DC time on release day) as well as Sugar: World Markets and Trade; Livestock and Poultry: World Markets and Trade; Dairy: World Markets and Trade, and U.S. Planting Seed Trade (available within a week after release.)

You can read the reports on the FAS home page (<http://www.fas.usda.gov>). The reports remain "current" until the succeeding issue is available. Older issues are available in the archives section of the home page. We also make selected cover articles and graphics available from these publications, in a separate section of the site. Reports are also available from the Economic Bulletin Board at Stat-USA, on the same schedule. For more information, you may contact Stat-USA at (202) 482-1986 (Monday-Friday, 8:30-5:30 p.m. Washington, DC time.)

For more information on the FAS home page, contact Glenn Kaup, tel. (202) 720-3329; fax. (202) 720-3229; or via e-mail kaup@fas.usda.gov

The U.S. Department of Agriculture (USDA) prohibits discrimination in its programs on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, and marital or familial status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint, write the Secretary of Agriculture, U.S. Department of Agriculture, Washington, DC 20250, or call 1-800-245-6340 (voice) or (202) 720-1127 (TDD). USDA is an equal employment opportunity employer.
